

To Whom It May Concern

I would like to provide a letter of support for Alithia Inc. and its founder Talula Hughes.

My personal background as a Speech and Language Pathologist working with School-aged children and their parents and my current position as an academic at Southern Cross University teaching Anatomy and Physiology to undergraduate students in the Coffs Harbour Campus has reinforced my strongly held beliefs in the value and importance of rounded learning for our children and young people.

Alithia Inc. is focused on providing enriched learning experiences for children on the Mid North Coast, an area with a high lower socioeconomic population.

Alithia Inc. provides cultural, creative and therapeutic opportunities that would be otherwise difficult for children to access in this region and also provides strong community links and strengthens community engagement in holistic development.

It is a pleasure to be involved with an organisation that aims to empower local families and allow children in this region to access a broader and richer learning experience.

Kind Regards

Cath Walsh
